

Zheng Liu

224-703-9606 • Email: zliu86@illinois.edu

SKILLS

Programming: Python, R, TensorFlow, Spark, C++, HTML/CSS, SQL, MATLAB, Amazon Web Service

EXPERIENCE

Data Science R&D intern, Civis Analytics, Summer 2018

Worked on a cross-functional team with data scientists and engineers to develop a product for record linkage and identity resolution.

- Researched, implemented, and evaluated methods for network analysis of person-record graphs.
- Designed and implemented a practical graph-based clustering pipeline to **cluster million-nodes graph**.
- Investigated **multi-layer graph embedding** using **Grassmann manifold learning**.
- Engaged in software engineering best practices such as unit testing, git version control, and code review.

Research assistant, University of Illinois at Urbana-Champaign, Urbana, IL, since 2015

Developed an automated drone for radiation source searching based on **reinforcement learning**.

- Developed **RL (RNN + Q learning)** algorithms to navigate drones in radiation source searching tasks.
- Integrated a drone and a radiation detector into an automated radiation detection platform.
- Constructed real-time data streaming and analyzing pipeline based on **Amazon Web Service**.

Developed machine learning algorithms for automated preclinical stereotactic neurosurgery platform.

- Implemented image segmentation and location detection with **Fully Convolutional Neural Networks**. Located anatomical points on rodent images with locating error less than 500 um.
- Utilized depth-camera to detect 3D positions of objects and investigated model registration.

Developed machine learning algorithms for radiation sensor networks.

- Environment radiation prediction with **Recurrent Neural Networks**.
- Radiation anomaly detection with **DBSCAN** and **Watershed Algorithm**.
- Background radiation modeling using **Maximum Likelihood Estimation** and **Gradient Descent**.

Lead the project of *Internet of Things: Mobile Radiation Sensor Networks*.

- Lead a team of four to design, implement and test a real-time streaming system for sensor networks.
- Developed an Android App to communicate with detectors through BluetoothSocket and collect data.
- Implemented **Amazon Web Service (Kinesis Firehose, Redshift)** to stream, visualize and store data.

EDUCATION

University of Illinois	Urbana-Champaign, IL
<i>PhD candidate, Nuclear, Plasma and Radiological Engineering, May 2019</i>	
University of Illinois	Urbana-Champaign, IL
<i>MS in Statistics, May 2018</i>	
University of Illinois	Urbana-Champaign, IL
<i>MS in Nuclear, Plasma and Radiological Engineering, May 2016</i>	
University of Science and Technology of China	Hefei, China
<i>Bachelor, Nuclear Engineering, June 2014</i>	

Related Courses

Machine Learning	Statistical Learning Theory	Big Data Optimization	Applied Stochastic Processes
Advanced Data Science	Applied Regression and Design	Random Process	Multivariate Analysis
